## SUB ZERO

Perfect for  
groups of 25 to  
100 people

There's nothing like a little friendly competition to bring people out of their shells and get them working together. Our Sub Zero Race Challenge offers a series of contests to give everyone – regardless of age, fitness or job title – the chance to contribute and compete. Whether it's department battling department, girls against guys or boardroom versus shop-floor, this is a lively challenge that gets everyone excited.

**Sledging Relay:** We give each of your teams a single sledge and a set time on the clock – the team that makes the most runs comes out on top.

**Tubing Drag Race:** Like the sledging relay, but this time your teams race to see how many runs they can make on one of our huge rubber rings.

**Team Luge Slide:** Each team takes a turn down our 60m Luge – the winner can be the team with the fastest individual run, the best combined team run or the quickest average time.

**Sledge Build:** Not just a race but a test of ingenuity and teamwork, on this challenge your teams need to create their own sledges before pitting them against their opponents in a time trial.

**Igloo Build:** The clock is set and our igloo is lying in 20 separate pieces at the centre of our maze. It's up to your teams to see if they can work together to put the giant 3D puzzle together – the team with the most pieces in place wins.

Prices can vary depending on your numbers and your needs – just give us a call to discuss.

# SNOW PARK

Perfect for groups of 8 to 80 people

Whether it's a get-to-know-you session, a reward for a job well done or a fun activity to start off a unique celebration, our Snow Park is built for a good time. With a range of activities on offer, an hour or two spent speeding down our slopes creates a shared experience your team won't forget any time soon. And if you're visiting with a larger group, we can even organise exclusive access – just ask.

**Downhill Donuts:** Anyone can ride down our tubing lane in a huge rubber ring. But who in your team can whizz down the slope after we've started them spinning? Let's find out.

**Luge Slip 'N' Slide:** Speeding down 60 metres of twisting, turning ice will transform anyone into a big kid. The question is, who on your team will scream the loudest on the way down?

**Sledge 'O' Mania:** Here, your team gets a choice – go for pure speed on the 'ski board' sledge, or weave your way down the slopes on the carver. Either way, it's a race to the finish line.

# THE SUMMIT CHALLENGE

Perfect for groups of 20+ people

Split into small teams, your group will have to tackle a series of challenges to make it to the mountain summit. Once everyone's kitted up, you have one hour to take on a number of tasks such as the ones listed below. You never know what will happen on the summit!

#### BLIZZARD

With high winds and blinding snow on the horizon, you only have minutes to prepare a shelter.

#### SNOW BLIND

Struck by snow blindness, half your team are stuck behind a perilous gully of obstacles and avalanches. Can the rest of the team guide them across using only their voices?

#### IMPROVISED SLED

Two of the team can't go on. It's up to the others to make a sled from whatever they can find in camp and get them down the mountain safely.

#### GLACIER CROSSING

A dangerous glacier riddled with crevasses lies ahead. The only safe way across is by roping together, spreading your weight and moving as one. Carefully does it.

#### ICE FIELD

Just as the team reaches an ice field, bad weather closes in – leaving conditions dangerous and visibility poor. Only with teamwork can everyone find a safe passage in the fastest time possible.

#### RIDGELINE TRAVERSE

The only way to the top is across a ridgeline with a 2,000ft drop to each side. Rope up and traverse it together – or there's a long fall waiting for you.

#### SUMMIT BID

Things are tough at the top. Can your whole team fit on the very pinnacle of the mountain? It's exposed and it's dangerous. But the group photos worth it.

#### THE VOID

One moment you're crossing a snow field, the next a large crevasse opens – separating the team from their gear. Using only the kit on you, can your team find a way to retrieve the vital equipment?

Our mountain can't be tackled alone. It takes a team. It's only when you work together with shared goals and a common purpose that you can overcome the elements, conquer the slopes and reach the summit.

Taking on a series of mountaineering challenges that mix physical and mental skills, you'll find new ways to communicate and collaborate: forging bonds, strengthening relationships and – most importantly – having fun.

You may arrive at Chill Factor as just a group of colleagues. After scaling the mountain together, your group will leave exhilarated, motivated and rewarded. Above all, you'll leave as a team.
